

New Hope Borough Shade Tree Commission

Communication on EAB

Bucks County is in the midst of an invasion by the Emerald Ash Borer, which kills ash trees that have not been treated by a certified arborist. The infestation method of the Emerald Ash Borer results in the ash tree dying from the top, which leads to the danger of falling branches and increases the risk to tree company personnel who are tasked with removal once the tree is infested.

Time is running out to be proactive! Contact a certified arborist now to review the health of ash trees on your property to determine how, or whether to apply a treatment or to remove the tree.

The New Hope Borough Shade Tree Commission has waived the application fee to remove ash trees that fall within the jurisdiction of the Commission, which, in part, are those trees that are “on any public highway in the Borough of New Hope, or that part of any tree, shrub or woody plant that extends within the lines of any public highway.” Public highway includes any street, sidewalk, or alley. Property owners have up to 12 months to replant trees for any ash trees removed.

A list of companies with certified arborists can be obtained from the New Hope Borough website <http://www.newhopeborough.org>. Joe McIlvaine Tree & Lawn Service has agreed to extend a discount to New Hope Borough residents for any work performed on ash trees; budgetary estimates are also on the Borough website.
